

Feedback - Group F - Covid 19 Vaccine

TA: Nico Rojas

04/02/2021

General Comments.

- This is a hot topic.
- However, I'm concerned you don't have a data-set, and you don't have a clear idea of the visualizations you will do and how do they fit to what is required in the syllabus. What are your interactive visualizations? Are you doing some text analysis or plotting some networks (this requirement may be levied)?
- I feel that you need to at have a data-set, open it and list a plan in terms of visualizations as soon as possible.
- If you are thinking to work on worldwide data you can try the [COVID-19 Data Hub R Package](#).
